

MUHAMMAD ATIF KHAN

Full Stack Developer | Building GenAI, RAG & Agentic AI Applications

Pakistan | +92-344-9092577 | muhammadatifkhan0906@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 1.5+ years of experience building scalable MERN, Next.js, and AI-powered applications. Skilled in AWS cloud deployment, CI/CD automation, RAG systems, and GenAI integrations, with a track record of delivering production solutions for international clients across healthcare, education, and business automation.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C++

Frontend: React.js, Next.js, Redux, Zustand, WebSockets

Backend: Node.js, FastAPI, REST APIs, Microservices, OAuth 2.0, NextAuth

Databases: PostgreSQL, MongoDB Atlas, Supabase, Qdrant (Vector DB), Redis

Cloud & DevOps: AWS, Vercel, Docker, CI/CD Pipelines, Nginx, Git

AI / ML: OpenAI API, Gemini API, LangChain, RAG Pipelines, Agentic AI, Prompt Engineering

PROFESSIONAL EXPERIENCE

Team Lead – Web — Wrapify Solutions (Onsite)

Nov 2024 – Present

- Built production-grade REST APIs with Node.js, implementing input validation, error handling, and role-based access control to improve system reliability.
- Deployed Dockerized applications to AWS with zero-downtime CI/CD releases, maintaining high availability across all environments.

Full Stack Web Developer — Association for Development & Law (ADL)

Apr 2026 – Jun 2026

- Rebuilt the company website using Next.js with server-side rendering and code splitting, improving Core Web Vitals, load speed, and SEO performance.
- Configured AWS CI/CD pipelines for zero-downtime releases and contributed to microservices architecture decisions across Agile sprints.

Full Stack Web Developer — Flutter Craft

Jan 2026 – Apr 2026

- Built AI-powered applications with Next.js and Node.js, integrating OpenAI and Gemini APIs to automate response workflows and reduce operational overhead.
- Designed RAG pipelines using Qdrant vector embeddings and deployed containerized microservices on AWS and Vercel via Docker and CI/CD.

Freelance Full Stack Developer — Self-Employed

Jan 2024 – Present

- Delivered end-to-end MERN and Next.js applications for international clients, integrating Razorpay payments, GenAI chatbots, and RAG pipelines.
- Managed full project lifecycle independently — architecture, development, deployment, testing, and post-launch maintenance.

KEY PROJECTS

AI Medical Availability System — React.js, Node.js, PostgreSQL, MongoDB, Docker, AWS

- Healthcare platform matching patients with nearby pharmacies in real time via location detection and live chat, with role-based Patient, Doctor, and Admin dashboards; containerized with Docker and deployed on AWS with CI/CD.

AI WhatsApp Business Automation — Next.js, Node.js, Qdrant, AWS, PostgreSQL

- WhatsApp Cloud API assistant using RAG pipelines and Qdrant vector embeddings to auto-generate contextual replies via Gemini API; runs serverless on AWS Lambda with PostgreSQL persisting conversation history.

AI-Powered LMS — MERN Stack, PostgreSQL, Google OAuth 2.0, Razorpay, Vercel

- Course platform with Razorpay payments, Google OAuth 2.0 SSO, and Student, Instructor, and Admin dashboards; frontend on Vercel with AWS RDS for scalable, managed database hosting.

Complaint Tracking & Management System — Next.js, Node.js, MongoDB, AWS, Nginx

- Role-based platform for real-time complaint submission, tracking, and resolution via REST APIs and authenticated dashboards; deployed on AWS behind Nginx for horizontal scaling and high availability.

EDUCATION

BS Computer Science — University of Engineering & Technology (UET), Peshawar

2022 – 2026

CERTIFICATIONS & AWARDS

- AWS Certified Cloud Practitioner (CLF-C02)
- Full Stack AI Development (GenAI, RAG & Agentic AI), Udemy — 2025
- Node.js, Coursera / HKUST — 2025
- 2nd Place, AI Hackathon, UET Peshawar 2025 (Agentic AI Web Scraper)
- Web Award, Team Lead, Computer Cell Society
- 4th Place, Peshawar Board
